

Community Hospital Emergency Departments Admissions for Persons Diagnosed with a Mental Illness, Developmental Disability or Substance Abuse Disorder

First Quarter SFY 2011-2012
(July-September 2011) Prepared by:
Quality Management Team

Community Policy Management Section
Division of Mental Health, Developmental Disabilities and Substance Abuse Services

This workbook is in response to North Carolina General Statute 112C-147.1.1 Section 10.49(r) which requires the Department of Health and Human Services to report on community hospital emergency department admissions of individuals with mental health, developmental disabilities, and substance abuse diagnoses. This workbook covers admissions for the first quarter of State Fiscal Year 2011-2012 (July – September 2011). This workbook differs from previous reports in that the Division is providing a data workbook directly to local managing entities (LMEs). While many of the charts and data elements provided in the previously published quarterly reports entitled "Community Hospital Emergency Department Admissions of Persons Diagnosed with a Mental Illness, Developmental Disability or Substance Abuse Disorder" are present in this workbook, this report offers data elements directly to the LMEs so that they can conduct their own analyses.

With the initiation of this workbook, there have been some changes to the data presented. One such change is the ICD-9 coding for the three disability groups. Previously, there were some codes that were assigned to the incorrect disability group. Also, the previously used codes did not include V codes for suicidal/homicidal ideation or E codes for self-inflicted injuries (suicide attempts). A listing of the new codes, as well as a crosswalk with the old codes, can be found at the end of the workbook.

This workbook is organized in the following manner:

Charts- Several pie charts were created using the statewide emergency department data so that comparisons could be made among diagnostic group, age and gender. All charts utilizing emergency department data are found directly following the tab labeled "Charts- TOC (Table of Contents)"

Tables- Several tables were created in order to compare admission rates and disposition status across diagnostic groups and LMEs. All tables utilizing emergency department data are found directly following the tab labeled "Tables- TOC(Table of Contents)".

Data- All data that was used to create charts and tables are provided in this section. All emergency department data are found directly following the tab labeled "Data- TOC(Table of Contents) "

Appendices-All appendices are found directly following the tab labeled "Appendices. "

Notes about data

Data for this workbook were obtained from the North Carolina Disease Event Tracking and Epidemiologic Collection Tool (NC DETECT). General information on this tool can be found in Appendix C. ICD-9 codes were used to identify primary and co-occurring diagnoses for mental health, developmental disabilities, and substance abuse disorders. These codes are listed in Appendix A. The International Statistical Classification of Diseases and Related Health Problems (most commonly known by the abbreviation ICD) provides codes to classify diseases and a wide variety of signs, symptoms, abnormal findings, complaints, social circumstances and external causes of injury or disease.

NC-DETECT data from the hospitals was compiled into a centralized database, and selected parts of it were extracted, aggregated, and sent to the Division of Mental Health, Developmental Disabilities and Substance Abuse Services (DMH/DD/SAS) for this report, through a data sharing agreement with the Division of Public Health.

The aggregate data included the total number of admissions as well as the number of admissions diagnosed with a mental health, developmental disabilities, and/or substance abuse disorder. The latter included primary and co-occurring ICD-9 diagnostic codes, recorded at the time of admission, using the NHAMCS 2005 Emergency Department Data Summary classification system.

The aggregate data included the following basic demographic information on admissions: 1) whether the admission was a child (under age 18) or an adult (age 18 and over); 2) whether the admission was a female or a male; 3) county of residence; and 4) the Local Management Entity (LME) service area in which the individual resides. It is important to note that counties and LMEs are both defined by the individual's county of residence, as reported by the individual.

CAUTION: In order to comply with HIPAA privacy protection protocols, NC DETECT has redacted data from cells that contain counts of 10 or less. This primarily affects the LME and county level data displayed in this report. The values in tables that have had data redacted have been replaced with an asterisk (*).

Due to data redaction and missing data elements in some records in the NC DETECT data (e.g. unable to identify consumer's county or LME, disposition not provided), totals for LME and county level data tables will not equal totals in the statewide section of this report, and total dispositions will not equal total admissions.

To avoid confusion and to facilitate comparison with state averages, "Statewide" numbers below LME and county data tables in this report represent actual [statewide summary data \(as this data is most complete\)](#), not necessarily the total of the numbers in the table above.

This workbook includes the categories of primary diagnosis and primary or co-occurring diagnosis. For this purposes of this workbook, the category "**primary**" is the most clinically significant ED diagnosis or the purpose of the ED visit. For the term "primary or co-occurring diagnosis" the mental health, developmental disability or substance abuse diagnosis can be one of any 11 diagnoses recorded during the ED visit.

Charts

Chart 1: Admissions By Diagnostic Group For Primary MH/DD/SA Admissions

Chart 2: Admissions by Diagnostic Group and Age for Primary MH/DD/SA ED Admissions- Adults Only

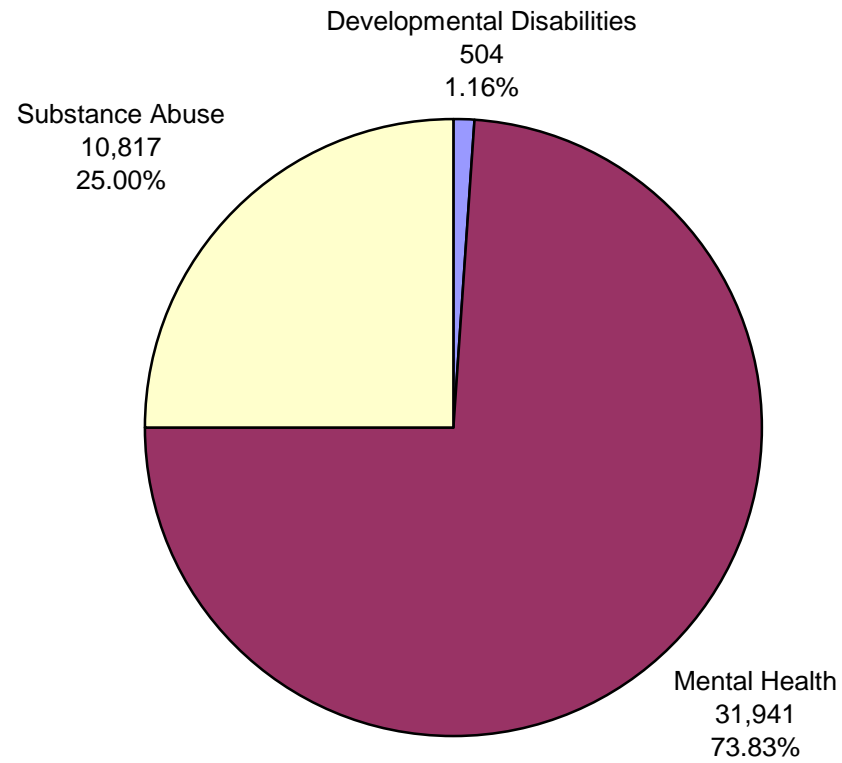

Chart 3: Admissions by Diagnostic Group and Age for Primary MH/DD/SA ED Admissions- Children Only

Chart 4: Admissions by Diagnostic Group and Gender for Primary MH/DD/SA ED Admissions- Females Only

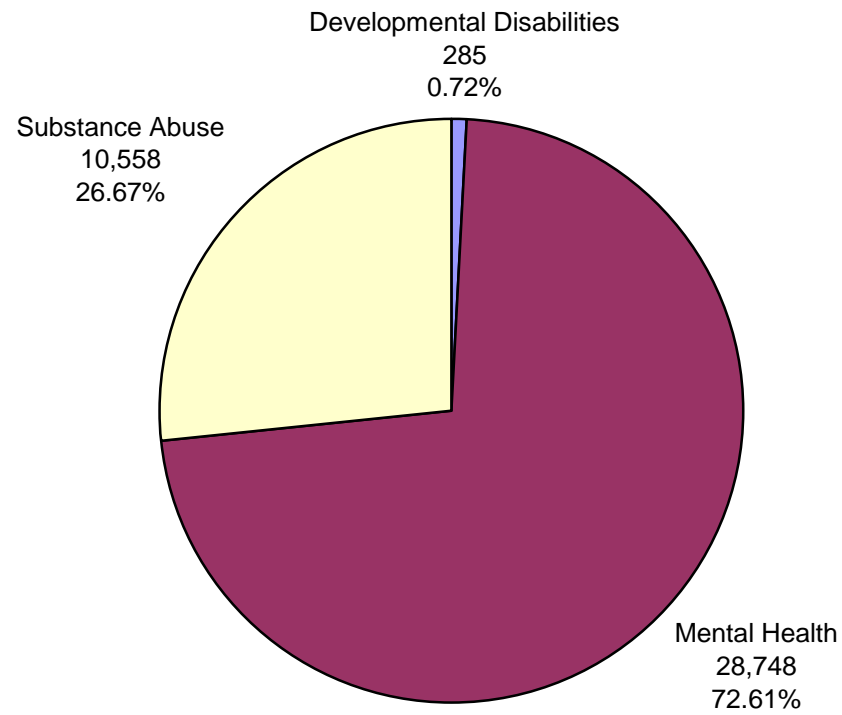

Chart 5: Admissions by Diagnostic Group and Gender for Primary MH/DD/SA ED Admissions- Males Only

Chart 6: Admissions by Diagnostic Group for Primary and Co-Occurring MH/DD/SA ED Admissions

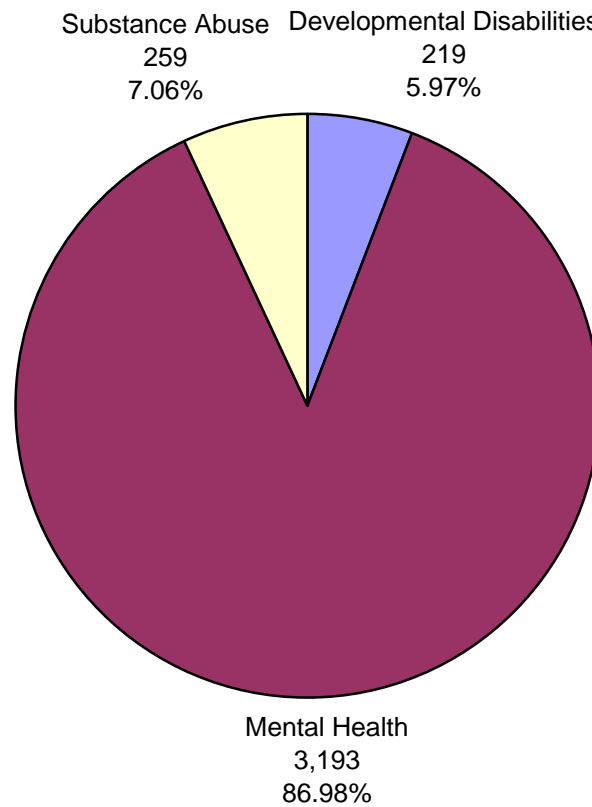

**Admissions by Diagnostic Group for Primary MH/DD/SA ED Admissions
July -September 2011
Total = 43,262**

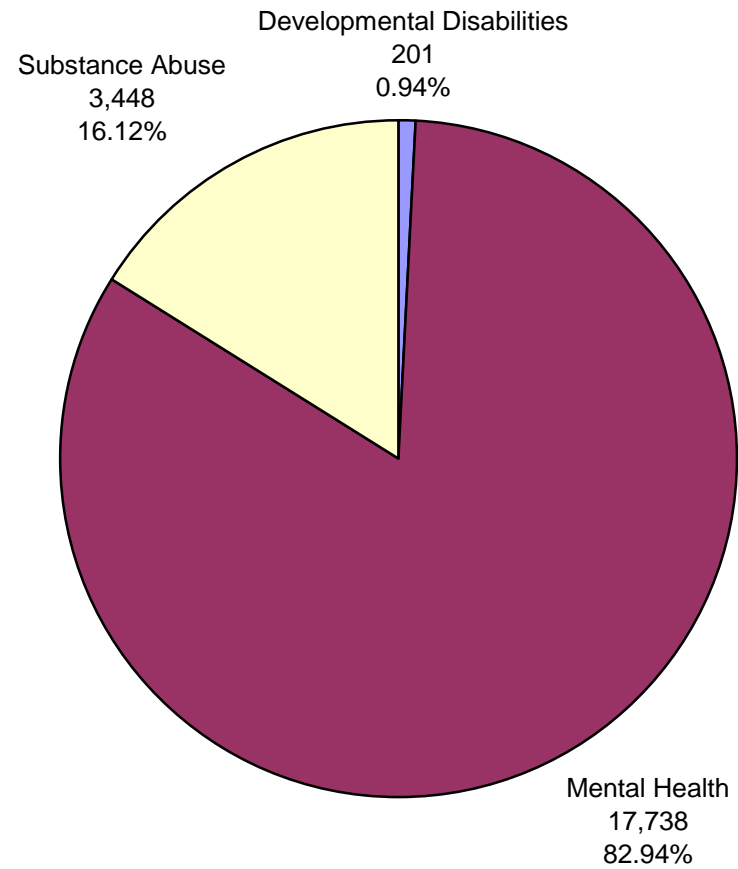

**Admissions by Diagnostic Group and Age for Primary MH/DD/SA ED Admissions
July-September 2011
Total = 39,591
Adults Only**

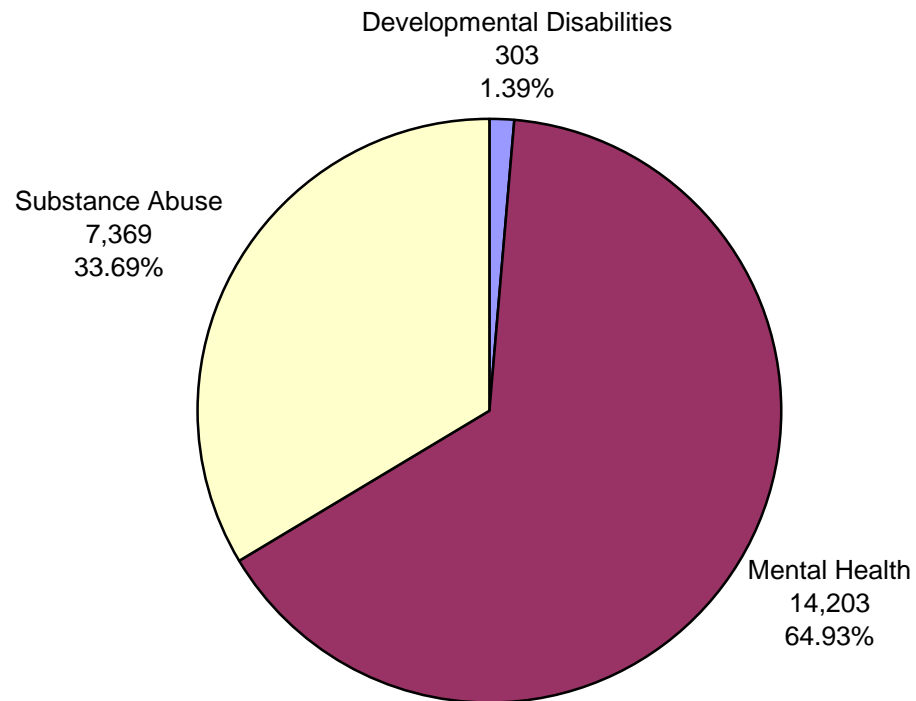

**Admissions by Diagnostic Group and Age for Primary MH/DD/SA ED Admissions
July-September 2011
Total = 3,671
Children Only**

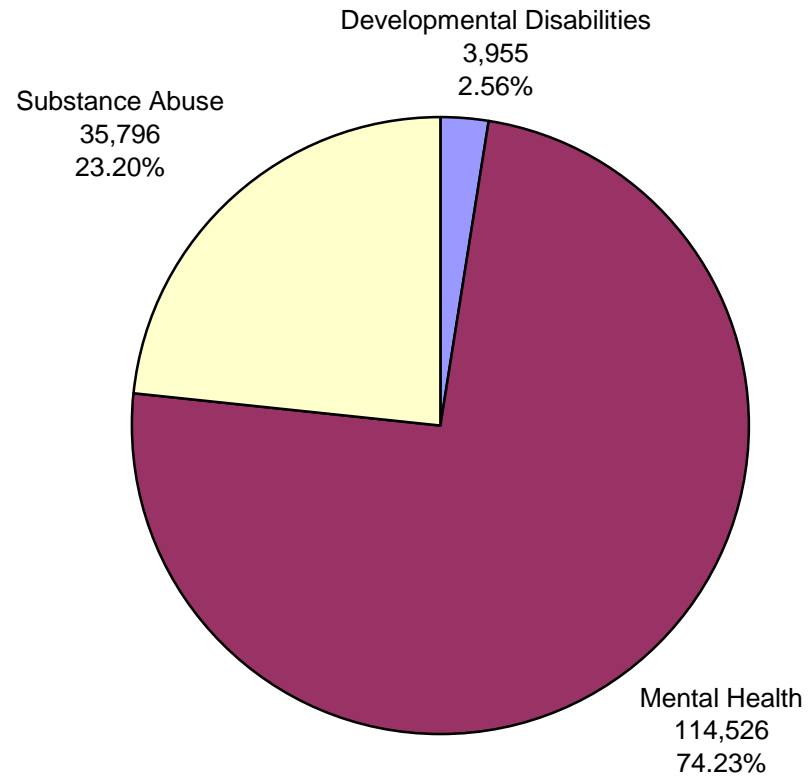

**Admissions by Diagnostic Group and Gender for Primary MH/DD/SA ED Admissions
July-September 2011
Total = 21,387
Females Only**

**Admissions by Diagnostic Group and Gender for Primary MH/DD/SA ED Admissions
July-September 2011
Total = 21,875
Males Only**

**Admissions by Diagnostic Group for Primary and Co-Occurring MH/DD/SA ED Admissions
July-September 2011
Total = 154,277**

Notes

1. "Admitted" is a general code that covers any person admitted as an inpatient to any unit of the hospital. It is intended to be used to report admissions to units other than Psych or ICU, which have their own codes; however, it is possible that some emergency departments may be using this code to report all admissions.
2. Includes transfer to prison, jail, general hospital, another type of institution, or to home care.
3. Other category is not clearly defined.
4. An asterisk (*) indicates the number was 10 or less. The actual number was redacted from the data that was provided for privacy protection reasons.
5. This report is based on the MH, DD, and SA Dx codes of interest that appear as any of the 11 allowable ICD-9 codes submitted by emergency departments.

Notes

1. "Admitted" is a general code that covers any person admitted as an inpatient to any unit of the hospital. It is intended to be used to report admissions to units other than Psych or ICU, which have their own codes; however, it is possible that some emergency departments may be using this code to report all admissions.
2. Includes transfer to prison, jail, general hospital, another type of institution, or to home care.
3. Other category is not clearly defined.
4. An asterisk (*) indicates the number was 10 or less. The actual number was redacted from the data that was provided for privacy protection reasons.
5. This report is based on the MH, DD, and SA Dx codes of interest that appear as any of the 11 allowable ICD-9 codes submitted by emergency departments.

Notes

1. "Admitted" is a general code that covers any person admitted as an inpatient to any unit of the hospital. It is intended to be used to report admissions to units other than Psych or ICU, which have their own codes; however, it is possible that some emergency departments may be using this code to report all admissions.
2. Includes transfer to prison, jail, general hospital, another type of institution, or to home care.
3. Other category is not clearly defined.
4. An asterisk (*) indicates the number was 10 or less. The actual number was redacted from the data that was provided for privacy protection reasons.
5. This report is based on the MH, DD, and SA Dx codes of interest that appear as any of the 11 allowable ICD-9 codes submitted by emergency departments.

ICD-9 Code Grouping	Description of Category
Mental Health	
290 - 290.99	Dementia/Delusional psychosis
293 -293.99	Organic delirium/delusions
294 -294.99	Dementia/Organic brain syndrome
295 -295.99	Schizophrenia
296 -296.99	Major Depression/Bipolar Disorder
297 -297.99	Paranoia/delusional disorders
298 -298.99	Unspecified psychosis
299.9	Childhood psychosis
300 -300.99	Anxiety disorders
301 -301.99	Personality disorder
302 -302.99	Psychosexual disorders
306 -306.99	Physiological malfunction from mental disorders
307 -307.99	Sleeping order/eating disorder
308 -308.99	Predominant emotional disturbance
309 -309.99	Brief/prolonged depressive reaction
310 -310.99	Specific non-psychotic mental disorders
311 -311.99	Depressive disorders
312 -312.99	Conduct disorders
313 -314.99	Emotional disturbance of childhood or adolescence
799.9	Other MH /unknown/unspecified
V79.0	Screening for depression
V62.84	Suicidal ideation/homicidal ideation
E950 -E959.0	Suicide and intentional self-inflicted injury
Substance Use and Abuse	
292 -292.99	Drug induced psychosis
304 -304.99	Drug dependence
305.20-305.99	Drug abuse
291 -291.99	Alcohol-related psychosis
303 -303.99	Alcohol dependence
305 -305.03	Alcohol abuse
V79.1	Screening for alcoholism
Developmental Disabilities	
315 -315.99	Developmental disabilities
V79 -V79.9	Range of DD early childhood/DD- unspecified (Excluding 79.0 and 79.1)
V79.2	Screening for mental retardation
V79.3	Screening for developmental handicaps in early childhood
V79.8	Screening for other specified mental disorders and developmental handicaps
V79.9	Screening for unspecified mental disorders and developmental handicaps
314.01	Hyperkinesias with DD
740 -742.99	Anomalies of the nervous system
743 -744.99	Anomalies of the eye, ear, face and neck (Excluding 744.1 -744.99)
748 -748.99	Anomalies of the respiratory system
754 -756.99	Anomalies of the musculoskeletal system
757 -757.99	Anomalies of the integument (Exclude 757.32 and 757.6)
758 -758.99	Chromosomal anomalies
759 -759.99	Other congenital anomalies
317	Mild mental retardation
318	Moderate mental retardation
318.1	Severe mental retardation
318.2	Profound mental retardation
319	Mental retardation, severity unspecified
299 -299.8	Autism

What is NC-DETECT?

The North Carolina Disease Event Tracking and Epidemiologic Collection Tool (NC DETECT) is the Web-based early event detection and timely public health surveillance system in the North Carolina Public Health Information Network. NC DETECT uses the CDC's CUSUM algorithms from the Early Aberration Reporting System (EARS) to monitor several data sources for suspicious patterns. The reporting system also provides broader public health surveillance reports for emergency department visits related to hurricanes, injuries, asthma, vaccine-preventable diseases, occupational health and others.

Who develops and manages NC-DETECT?

Staff at the UNC Department of Emergency Medicine (UNC DEM), under contract to the North Carolina Division of Public Health (NC DPH) develop and manage NC DETECT. UNC DEM collaborates with NC DPH on all aspects of NC DETECT development.

How is NC DETECT related to NCHESS?

Data from the North Carolina Hospital Emergency Surveillance System (NCHESS) are loaded into NC DETECT (which was formerly known as the North Carolina Bioterrorism and Emerging Infection Prevention System, NC BEIPS). The NC DETECT team at the UNC Department of Emergency Medicine monitors the quality of the NCHESS data and work with hospitals, their vendors and the North Carolina Hospital Association (NCHA) to ensure NC DETECT users have access to the most accurate data possible.

How have North Carolinians benefited from NC DETECT?

With NC DETECT, public health officials at the local, regional and state levels are able to monitor a variety of important public health issues in a secure and timely fashion, including influenza, post-hurricane health issues, injury and violence, and vaccine-preventable disease surveillance. For example, NC DETECT users have monitored illness and injury effects after hurricanes Isabel and Ophelia, analyzed ED use at select hospitals by Katrina evacuees, and uncovered unreported cases of tuberculosis. Before NC DETECT, similar surveillance was either simply not performed, relied on manual, redundant data entry, or had a considerable time lag. A summary of specific NC DETECT outcomes is also available. Since NC DETECT is designed to uncover suspicious patterns of illness in both human and animal populations, it is a key tool in the early detection of emerging infectious diseases, such as new strains of influenza

Who pays for NC DETECT?

NC DETECT is funded from federal bioterrorism grants administered through the Centers for Disease Control and Prevention and disbursed by the North Carolina Department of Health and Human Services, Division of Public Health.

For more Information: ncdetect@listserv.med.unc.edu, (919) 843-2361

Data

Data Set 1. Statewide Admissions All Causes by Gender

Data Set 2. Statewide Admissions for Primary Behavioral Health Diagnoses by Disability Group, Age Group and Gender

Data Set 3. Statewide Admissions for Primary and Co-Occurring Behavioral Health Diagnoses by Disability Group, Age Group and Gender

Data Set 4. Disposition for Primary and Co-Occurring Behavioral Health Diagnoses by Disability Group and LME

Data Set 5. Statewide Disposition for Primary and Co-Occurring Behavioral Health Diagnoses by Disability Group

Data Set 6. Alamance-Caswell LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 7: Beacon Center LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 8: Centerpoint LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 9: Crossroads LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 10: Cumberland LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 11: Durham LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 12: ECBH LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 13: Eastpointe LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 14: Five County LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 15: Guilford LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 16: Johnston LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA

Data Set 17: Mecklenburg LME Disposition Of Admissions With Any (Primary Or Co-Occurring) Diagnosis Of MH/DD/SA
